

Covid+ patient d/c from ED/Inpatient with Masimo Safety Net **AND** Oxygen (MAX 2 LPM)

Covid+ patient d/c from ED with Masimo **AND** Oxygen

RN sets up patient in Masimo system (Denotes Oxygen by placing AAA in front of patient's name)

MD Orders HHC for Evaluation and Treatment of Oxygen Management week of (three days from actual discharge)
ex: DC from ED 7/24, order reads: Evaluation & Treatment of Oxygen Management week of 7/27/20

Order is sent to BHHC via Navihealth for Medicare, UHC and Unfunded patients.
Patients going to other HHC agency will follow the agency protocol for monitoring oxygen, while patient on Masimo Safety Net

Notification via email is sent to DG group (Home Health Team to the Transfer Center) confirming referral acceptance. Transfer Center nurses will continuously monitor these patients up to the 12 days

Transfer Center RN and Home Care RN will communicate to coordinate patient visit(s) as needed

The HHC nurse will obtain orders to discontinue oxygen when saturation > 94% at rest on room air and with activity

Home Care will discuss with e-ICU Provider for an order to DC Oxygen and from program (No sooner than 8 days)
